SKILLS

Data Tools: Power BI, IBM Cognos, Tableau, AWS, Advanced Excel (Pivot, Power Query, VBA), Oracle (Fusion/SmartView),

Database Systems: ADO.NET, MySQL, MongoDB, Relational Databases, Oracle, PostgreSQL, Snowflake

Programming & Automation: Python, SQL, VBA, R, Angular, JavaScript, SAS, Stata, MATLAB, Java, C++. PowerShell

Software: Microsoft 365, SharePoint, JIRA, Git, PowerPoint, MS Excel, Android Studio, Canva

PROFESSIONAL EXPERIENCE

Data and Tutoring Lead, Baltimore City Public Schools System, University of Maryland

January 2024 – December 2025

- Managed the RTTP Program site and led the tutor team, resulting in enhanced tutor performance, improved student engagement, and a 25% increase in participation in tutoring sessions.
- Monitored curriculum delivery and implemented data-driven feedback systems, ensuring 100% compliance with academic standards and a 5% improvement in math scores.
- Fostered strong relationships with school staff and organized weekly engagement activities, leading to a 40% rise in program attendance and heightened student enthusiasm for learning.
- Designed and maintained Power BI and Excel tracking dashboards to analyze academic performance, identifying key intervention areas that optimized outcomes by 25%.

Research Assistant, University of Maryland

March 2025 – Present

- Analyzed FED financial data across 224,329 firm-quarters, and 209 variables, including GDP trends, market volatility, and debt ratios.
- Performed data cleaning and statistical transformations on key financial metrics, such as \$46.89M median quarterly sales and \$212.9M median market value by working on Stata
- Prepared research reports and visual analyses covering 18 years (2000–2018), illustrating the impact of the 2008 financial crisis and a 53% drop in Q4 firm observations by 2018.

Full-Stack Developer, CAMP Systems International, Inc.,

June 2022 – December 2023

- Collaborated with the DevOps team for 12 months to develop functionalities in Ops Edge and iCamp applications using Angular and ADO.Net (C#), integrating AWS for data storage, and enhancing retrieval efficiency by 40%.
- Engineered and deployed critical application features that strengthened data accessibility for maintenance personnel, reducing average task completion time by 25% and improving operational efficiency by 30%.
- Collaborated with team AMSTAT, for 6 months and analyzed aircraft maintenance data to identify trends and patterns, potentially leading to recommendations for preventative maintenance strategies.

Programmer Analyst Trainee, Cognizant

December 2021 – May 2022

- Completed Cognizant's Gen C learning program, achieving a (high 80s or 90s) score in Stage 1 (QEA Basics) and proficiency in Selenium with Digital Technologies proven through completing 3+ projects involving web automation.
- Developed adaptive issue resolution skills through Agile methodology, resulting in a 20% reduction in average resolution time.
- Achieved a score of 96 on Integrated Capability Tests (ICT) by employing advanced troubleshooting techniques and enhancing the team's overall analytical capabilities by 20%.

PROJECTS

Portfolio Optimization with Machine Learning Techniques

January 2024 -April 2024

- Technologies:** Python, Scikit-learn, Pandas, Matplotlib, Seaborn
- Modeled 5 portfolio strategies and achieved a 25% improvement in annualized return vs. equal-weight baseline.
- Applied K-Means clustering to 100+ assets, optimizing Sharpe Ratio (0.75) and minimizing 20% drawdown.
- Visualized efficient frontier and Capital Market Line to compare volatility across Monte Carlo and MPT models, enhancing allocation accuracy by 30%.

Airline Customer Satisfaction Analysis

January 2024 -April 2024

- Technologies:** Python, XGBoost, Seaborn, Pandas, Logistic Regression
- Processed 103,904 passenger records with 22 features, improving model accuracy by 18% using tuned XGBoost (F1-score of 0.89).
- Identified the top 5 drivers of dissatisfaction using SHAP analysis, reducing false positives by 22% over baseline.
- Delivered strategic recommendations addressing primary concerns to improve overall customer satisfaction by 15%.

Regression Model for Predicting Stock Price

August 2022 - December 2022

- Technologies:** Apache Spark, Power BI, MongoDB, Python
- Processed 75,000 crash images (8.5GB) with metadata using Apache Spark, reducing overall traffic analysis time by 40%.
- Identified high-risk crash zones based on ego vehicle involvement, day/night visibility patterns, and weather across 50K+ frames.
- Delivered interactive Power BI dashboards with 6 key visual insights, enabling a 30% improvement in traffic safety investment ROI.

CERTIFICATIONS

Orientation Advising, University of Maryland Baltimore County

December 2024

Google Cloud Computing Certificate, Google Cloud

May 2024

Introduction to Augmented Reality and AR Core, Coursera

June 2020

EDUCATION

Masters in Data Science, University of Maryland Baltimore County

December 2025

Coursework: Financial Data Science, Data Management, Big Data and Platforms, Machine Learning, Project Management

Bachelor of Technology in Computer Science and Engineering, Jawaharlal Nehru Technological University

May 2022

Coursework: Calculus, Software Engineering, Computer Architecture, Object Oriented Programming, SDLC
